

## Twilio in n8n

# Last amended: 1<sup>st</sup> March, 2025

# Ref: <https://n8n.io/workflows/401-send-an-smswhatsapp-message-with-twilio/>

# My folder: Onedrive->flowise->n8n->2.twilio

The screenshot shows the Twilio Account Dashboard for a user named 'ashokharnal'. The dashboard is divided into several sections. On the left is a dark sidebar with navigation links: 'Account Dashboard', 'Develop', 'Monitor', 'Phone Numbers' (with sub-links: Manage, Port & Host, Regulatory Compliance, Short Codes, Alphanumeric Sender IDs), 'Messaging' (with sub-links: Overview, Try it out, Services, Senders, Content Template Builder, Settings), and a 'Beta' badge. The main content area has a top banner with an 'Upgrade your account' button and a 'Talk to Sales' button. Below this is the 'Account Info' section, which displays the 'Account SID' (AC4d9993bbc17c2101ba7c4164c80949ad), the 'Auth Token' (1784489e9d43be1167ea599f928e0d89), and the 'My Twilio phone number' (+17342945743). A warning message states: 'You are in a trial account and can only send messages and make calls to verified phone numbers. Learn more about your trial account'. There are also 'Helpful links' on the right, including 'How does Twilio work?', 'API documentation', 'Explore Marketplace', and 'Support help center'.

**Account SID number:**

AC4d9993bbc17c2101ba7c4164c80949ad

**Auth Token**

1784489e9d43be1167ea599f928e0d89

**My Twilio phone number**

+17342945743

**My Phone Number:**

+918750893093

Refer [here](#) to configure Twilio.

## Using Auth Token

To configure this credential, you'll need a [Twilio](#) account and:

- Your Twilio **Account SID**
- Your Twilio **Auth Token**

To set up the credential:

1. In n8n, select **Auth Token** as the **Auth Type**.
2. In Twilio, go to **Console Dashboard > Account Info**.
3. Copy your **Account SID** and enter this in your n8n credential. This acts as a username.
4. Cop your **Auth Token** and enter this in your n8n credential. This acts as a password.

Refer to [Auth Tokens and How to Change Them](#) for more information.

Configuration of Twilio node.  
Only SMS works not WhatsApp.
