VS Code help

===========\

</div>

1. How to change to your python virtual environment:

This is the recommended method for selecting an environment for your current workspace.

1. **Open the Command Palette:** Press `Ctrl+Shift+P` (Windows/Linux) or `Cmd+Shift+P` (macOS).
2. **Search for the command:** Type "Python: Select Interpreter" and select it from the list of commands.

2, Which is my current working python Virtual environment:

1. Check the Status Bar
The easiest way to see the active interpreter is to look at the bottom-right corner of the VS Code window. The name and version of the currently selected Python interpreter will be displayed there.

- If no interpreter is selected, it might say something like "Python" or "Select Interpreter".
- Clicking on this area is a shortcut to change the interpreter.

*Figure 1: Bottom right of VS code mentions
'dream' as the active python interpreter*
